

RANGE 100

INDUCTION CAPSEALER TIE 100

This machine is designed to seal heat-seal aluminium based liners through the caps onto plastic or glass containers.

It includes :

- an induction power supply EMBATHERM GTE2500,
- a frame that can be adjusted in height,
- a coil,
- a control pedal.

Presenting the capped containers under the coil is done by hands.

Adjustments are extremely quick and easy.

The two sizes of standard coils allow to seal caps from diam. 25 to 80 mm or from 40 to 95 mm. Sealing parameters (time and power) are directly displayed and can be easily modified on the touch screen of the power supply.

Without any heating element, any burn risks is avoided.

This small machine is particularly suitable for small productions or lab works.

Characteristics :

Frame size: 160x500x550 mm
Power supply size : 330x264x102 mm
Weight: 15 kg
Electrical power : 2,5 kW
Tension : 220 V monophasé

Packagings sizes :

Diameter: < 95 mm
Height (standard): < 350mm

Option : spotting of the height adjustment by a vernier.
